Notes to the Financial Statements (unaudited)

1. Accounting policies

Basis of preparation

The condensed unaudited interim financial statements for six months ended 31 December 2020 have been prepared in accordance with International Accounting Standard ("IAS") 34 "Interim Financial Reporting", the UCITS Regulations and the Central Bank UCITS Regulations.

These unaudited financial statements do not include all of the information required for full annual audited financial statements, and should be read in conjunction with the Company's most recent annual audited financial statements as at and for the financial year ended 30 June 2020.

The condensed interim financial statements are unaudited. The statutory auditors' report in the most recent annual audited financial statements as at and for the financial year ended 30 June 2020 was unqualified. The condensed interim financial statements are prepared under the historical cost convention as modified by the revaluation of financial assets and financial liabilities at fair value through profit or loss.

The financial statements are prepared on a going concern basis for all Funds. The preparation of the condensed interim financial statements requires the Directors and their delegates to make certain accounting estimates and assumptions. Actual results may differ from those estimates and assumptions. It also requires the Directors and their delegates to exercise judgement in the process of applying the Company's accounting policies.

There have been no changes to the accounting policies, methods of computation and critical accounting estimates and judgements applied by the Company since the most recent annual audited financial statements for the financial year ended 30 June 2020.

New accounting standards and interpretations

There are no standards, interpretations or amendments to existing standards that are effective for the first time from 1 July 2020 that have a material impact on the amounts recognised in the prior periods or will affect the current or future periods.

2. Taxation

Under current law and practice the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. Accordingly, it is not generally chargeable to Irish tax on its income or gains. However, Irish tax may arise on the happening of a chargeable event in the Company. A chargeable event includes any distribution payments to shareholders, any encashment, redemption, cancellation or transfer of shares and the holding of shares at the end of each eight year period beginning with the acquisition of such shares.

No Irish tax will arise on the Company in respect of chargeable events in respect of:

- a shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the
 chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes
 Consolidation Act, 1997, as amended, are held by the Company, or the Company has been authorised by the
 Irish Revenue to make gross payments in the absence of appropriate declarations;
- certain exempted Irish tax resident shareholders who have provided the Company with the necessary signed statutory declarations;
- in the absence of an appropriate declaration, the Company will be liable to Irish tax on the occurrence of a chargeable event;
- capital gains, dividends and interest received may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by the Company or its Shareholders.

For the six months ended 31 December 2020, withholding tax was US\$ 239,462 (31 December 2019: US\$ 227,800). With respect to capital gains tax, for the six months ended 31 December 2020, capital gains tax was US\$ 232,186 (31 December 2019: US\$ Nil).

3. Cash and cash equivalents

All cash and cash equivalents, including overnight deposits at market rates, are held with State Street Custodial Services (Ireland) Limited, whose ultimate parent company, State Street Bank and Trust Company has a long term credit rating of A by Standard & Poor's as at 31 December 2020 and 30 June 2020.

4. Share capital

The share capital of the Company was at all times equal the net asset value of the Company. The Directors are empowered to issue up to five hundred billion (500,000,000,000) Shares of no par value in the Company at the net asset value per Share on such terms as they think fit. There are no rights of pre-emption upon the issue of Shares in the Company.

Subscriber shares

The Company issued 2 subscriber shares to the value of €2 on the date of incorporation of the Company. The subscriber shares do not participate in the assets of any Fund and are held by Kevin Murphy and Sarah Cunniff, former Directors of the Company and employees of the Company's legal advisers in Ireland.

The subscriber shares' entitlement is limited to the amount subscribed and accrued interest thereon. The subscriber shares entitle the Shareholders holding them to attend and vote at all meetings of the Company, but do not entitle the holders to participate in the dividends or net assets of any Fund or of the Company.

Anti-dilution levy

In the event of receipt for processing of net subscription or net redemption requests subscriptions to and redemptions from Funds will incur an "anti-dilution levy" representing a provision for market spreads (the difference between the prices at which assets are valued and/or bought or sold), duties and charges and other dealing costs relating to the acquisition or disposal of assets and to preserve the value of the underlying assets of a Fund.

The anti-dilution levy will be subject to regular review by the Directors and/or the Manager and are based on actual costs up to a maximum of 0.25% of the value of any net subscription or net redemption of each class of shares of each Fund. Any such provision will be added to the price at which shares will be issued in the case of net subscription requests and deducted from the price at which shares will be redeemed in the case of net redemption requests. Any such sum will be paid into the account of the relevant Fund. Anti-dilution levies applied to the period ended 31 December 2020 was US\$ 77,230 (period ended 31 December 2019: US\$ 48,222).

Redeemable participating shares

Each of the Participating Shares entitles the shareholder to participate equally on a pro rata basis in the dividends and net assets of a Fund attributable to the relevant class in respect of which they are issued, save in the case of dividends declared prior to becoming a shareholder. The Subscriber Shares' entitlement is limited to the amount subscribed and accrued interest thereon.

Redeemable participating shares may be redeemed on each dealing day which is each business day at the net asset value per share based on mid prices.

All voting shares issued entitle the holder to attend and vote at meetings of the Company and of the Fund represented by those shares. No class of shares confers on the holder thereof any preferential or pre-emptive rights or any rights to participate in the profits and dividends of any other class of shares or any voting rights in relation to matters relating solely to any other class of shares.

On a winding up or if all of the shares in any Fund are to be repurchased, the assets available for distribution (after satisfaction of creditors' claims) shall be distributed pro rata to the holders of the shares in proportion to the number of the shares held in that Fund. Where upon final settlement of the Company's creditors results in an excess of assets over liabilities of the Company, such excess will be paid to the Company's final shareholder.

If repurchase requests on any Dealing Day exceed 10% of the total number of shares in a Fund, the Directors may elect to restrict the repurchase requests to 10% or a higher percentage, in which case all the relevant requests will be scaled down to pro rata and treat any excess repurchase requests as if they were received on each subsequent Dealing Days and these requests shall be prioritised over any repurchase requests received for subsequent Dealing Days, except where the Net Asset Value determination has been temporarily suspended.

5. Efficient portfolio management

The Company employs techniques and instruments relating to transferable securities, money market instruments, securities lending transactions, repurchase agreements and/or other financial instruments in which they invest for efficient portfolio management purposes.

At any time a Fund may hold a combination of instruments such as futures, options, swaps, forward foreign currency contracts, warrants and convertible securities any of which may be listed or over-the counter, subject to the restrictions set forth in the Prospectus and to the extent consistent with the Fund's investment objective and policies.

The use of techniques and instruments relating to transferable securities, money market instruments and/or other financial instruments in which the Funds invest for efficient portfolio management purposes will generally be made for one or more of the following reasons:

- i) the reduction of risk;
- ii) the reduction of cost; or
- iii) the generation of additional capital or income for the relevant Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the UCITS Regulations and Central Bank UCITS Regulations.

The use of FDIs and efficient portfolio management techniques for the purposes outlined above will expose the Fund to the risks including (but not limited to) Derivatives risk, Credit risk, Counterparty risk and Collateral risk. Please refer to the Portfolio of Investments for range of FDIs and repurchase agreements which the Fund may have used for efficient portfolio management purposes during the period under review.

Please refer to the Prospectus for details of all the risks the Funds might be exposed to due to the use of FDIs and efficient portfolio management techniques.

The risks arising from the use of such techniques and instruments shall be adequately captured in the Company's risk management process.

All the revenues arising from efficient portfolio management techniques employed shall be returned to the relevant Fund following the deduction of any direct and indirect operational costs and fees arising.

Such direct and indirect operational costs and fees, (which are all fully transparent and which shall not include hidden revenue) which shall include fees and expenses payable to repurchase/reverse repurchase agreements counterparties and/or securities lending agents engaged by the Company from time to time. Such fees and expenses of any repurchase/reverse repurchase agreements counterparties and/or stock lending agents engaged by the Company, which will be at normal commercial rates together with VAT, if any, thereon, will be borne by the Company or the Fund in respect of which the relevant party has been engaged.

Realised and unrealised gains and losses on efficient portfolio management transactions during the period and prior period under review are recognised within net investment income in the Statement of Comprehensive Income.

Article 13 of Regulation (EU) 2015/2365 on transparency of securities financing transactions ("SFTs") and of reuse and amending Regulation (EU) No 648/2012, requires UCITS investment companies to provide securities financial transactions regulation ("SFTR") details. None of the Funds entered into securities lending arrangements, total return swaps or repurchase agreements during the six months ended 31 December 2020 or during the prior financial period therefore the Funds are not subject to the SFTR. Counterparties are disclosed at the base of the Schedules of Investments.

6. Financial instruments

(a) Financial risk management objectives, policies and processes

In pursuing its investment objectives, the Company is exposed to a variety of financial risks: market risk (including interest rate risk, foreign exchange risk and price risk), credit risk and liquidity risk which could result in a reduction in the Company's net assets. The Company's overall risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Company's financial performance.

The Company's policies and processes for managing the risks of the Funds are detailed in the Prospectus.

The Company's financial risk management objectives and policies continue to be consistent with those disclosed in the Company's annual report and audited financial statements as at and for the financial year ended 30 June 2020.

(b) Fair Value Hierarchy

The Funds classify fair value measurements using a fair value hierarchy that reflects the subjectivity of the inputs used in making measurements.

The fair value hierarchy has the following levels:

- (i) quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1);
- (ii) inputs other than quoted prices included within level 1 that are observable for the asset or liability either directly (as prices) or indirectly (derived from prices) (level 2); and
- (iii) inputs for the assets or liability that are not based on observable market data (unobservable inputs) (level 3).

Various inputs are used in determining (measuring) the fair value of each Fund's investments. Each Fund classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. Assessing the significance of a fair value measurement requires judgement, considering factors specific to the investment. Such factors may be observable or unobservable. The determination of what constitutes "observable" also requires judgement by the Investment Manager. The Funds consider observable data to be market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

Performance fees

The Investment Manager will be entitled to receive a Performance Fee out of the assets of the Fund in respect of Class A, Class E, Class G and Class I shares. The Performance Fee is 15% of the amount by which the Fund outperforms its Benchmark Index for the relevant period (after deduction of the Base Fee but before the deduction of any accrued Performance Fee). If the return on the Fund in any year is less than its Benchmark Index, the difference for that year will be carried forward and applied against the subsequent year's return for the Fund for the purpose of calculating a Performance Fee. The shortfall will be carried forward until a Performance Fee becomes payable. No Performance Fee can be paid unless all prior underperformance has been clawed back. The International Fund accrued US\$ 8,863, Asia Fund US\$ 503,473 and Japan Fund accrued a performance fee of US\$ Nil during the period under review which is payable as at 31 December 2020 (for period ended 31 December 2019: International Fund: US\$ Nil; Asia Fund US\$ 858 and Japan Fund US\$ Nil).

Directors' fees

The disclosure relating to Directors' fees is included in note 8.

Allocation of fees and expenses

All fees, expenses, duties and charges will be charged to the relevant Fund and within such Fund to the classes in respect of which they were incurred. Where an expense is not considered by the Directors to be attributable to any one Fund, the expense will normally be allocated among the Funds based on a relative net asset allocation, an equal allocation, or other allocation methodologies determined by the nature of the expense. In the case of any fees or expenses of a regular or recurring nature, such as audit fees, the Directors may calculate such fees or expenses on an estimated figure for yearly or other periods in advance and accrue them in equal proportions over any period.
