### FIRM AND FUND INFORMATION

#### Firm Overview:

Platinum Asset Management is a Sydney-based fundamental long/short equity fund manager established in 1994. Platinum's index-agnostic approach seeks to deliver long term absolute returns by looking beyond short-term market turbulence caused by events of a transient nature to seek out 'unfashionable' companies whose actual worth is greater than the value implied in their present share price. Similarly, when Platinum's research reveals that a company's prospects are overvalued, Platinum may short-sell such stocks. Platinum also seeks to protect capital via adjusting net exposure to markets.

Estimated tonnes of carbon emissions per 100k invested

11.1

This estimate has been calculated by Platinum and represents the sum of the carbon emissions from the fund's underlying long stock positions, based on the closest match and latest data available in Sustainalytics, having regard to the fund's level of ownership in each company. For the proportion of the fund's long portfolio for which carbon emissions data is not available, the rate of carbon emissions for the long portfolio for which carbon emissions data is available, is applied. This is an estimate and is subject to change. The actual carbon emissions attributable to the fund may vary considerably from the estimate provided.

Source: Platinum. Returns are total returns, calculated using the NAV per share of the stated share class, are pre-tax, net of fees and costs (note the anti-dilution levy is not an expense of the fund) and assume the accumulation of net income and capital gains attributable to the relevant share class. **Past performance is not a reliable indicator of future performance.** Returns are calculated in their respective class currencies and could be reduced, or losses incurred, due to currency fluctuations.
