

Platinum World Portfolios - International Fund FOR PROFESSIONAL CLIENTS ONLY

MONTHLY REPORT 30 SEPTEMBER 2023

FIRM AND FUND INFORMATION

Firm Overview:

Platinum Asset Management is a Sydney-based fundamental long/short equity fund manager established in 1994. Platinum's index-agnostic approach seeks to deliver long term absolute returns by looking beyond short-term market turbulence caused by events of a transient nature to seek out 'unfashionable' companies whose actual worth is greater than the value implied in their present share price. Similarly, when Platinum's research reveals that a company's prospects are overvalued, Platinum may short-sell such stocks. Platinum also seeks to protect capital via adjusting net exposure to markets.

CONTRIBUTION TO RETURN

	Long Positions	Short Positions	Cash & Liquids
1 month	(3.6)	0.7	(0.2)
Calendar year to date	4.9	(3.9)	(0.3)

Contribution to return (CTR) is calculated by geometrically linking the daily monetary return (in USD) that the fund's long, short and cash positions contribute as a percentage of the daily average invested capital (adjusted for fund flows) over the relevant period. CTR calculations are gross of all fund fees and costs.

Past performance is not a reliable indicator of future performance. Returns are in US\$ and could be reduced, or losses incurred, due to currency fluctuations. Fund performance figure for the month of November 2015 is calculated from 16 November 2015 (fund's inception date) to 30 November 2015.

Source: Platinum Investment Management Limited for fund returns and CTR, and Factset Research Systems for the index returns. Fund returns are total returns, calculated using the NAV per share of D Class, are pre-tax, net of fees and costs (note the anti-dilution levy is not an expense of the fund) and assume the accumulation of net income and capital gains. The returns depicted in the line graph are cumulative on US\$100,000 invested in D Class since inception. MSCI returns are the returns of the MSCI AC World Net Index in US\$ ("index"). Platinum does not invest by reference to the weightings of the index, which is provided as a reference point only. All data where MSCI is referenced is the property of MSCI Limited ("MSCI"). No use or distribution of this data is permitted without the written consent of MSCI. This data is provided "as is" without any warranties by MSCI. Estimated tonnes of carbon emissions per 100k invested 10.0

This estimate has been calculated by Platinum and represents the sum of the carbon emissions from the fund's underlying long stock positions, based on the closest match and latest data available in Sustainalytics, having regard to the fund's level of ownership in each company. For the proportion of the fund's long portfolio for which carbon emissions data is not available, the rate of carbon emissions for the long portfolio for which carbon emissions data is available, is applied. This is an estimate and is subject to change. The actual carbon emissions attributable to the fund may vary considerably from the estimate provided

1. The "Long %" is the exposure to long securities and long securities/index derivative positions, the "Short %" is the exposure to short securities and short securities/index derivative positions, the "Net %" is the difference between the long % and the short %, and the "Gross %" is the sum of the long % and short % - each as a percentage of the fund's portfolio value.

2. Country classifications for securities reflect Bloomberg's "country of risk" designations.

3. Sector classifications generally reflect GICS sectors. Index positions (whether through ETFs or derivatives) are only included under the relevant sector if they are sector specific, otherwise they are included under "Other".

4. Figures used in market cap breakdown are sourced from Bloomberg.

5. "Currency Breakdown" is the effective currency exposure as a percentage of the fund's portfolio value taking into account long and short securities, cash, forwards and long and short securities/index derivative positions. Currency classifications for securities reflect the relevant local currencies of the Bloomberg "country of risk" designations.

6. As a % of the fund's portfolio value.

Estimated tonnes of carbon emissions per 100k invested

11.2

This estimate has been calculated by Platinum and represents the sum of the carbon emissions from the fund's underlying long stock positions, based on the closest match and latest data available in Sustainalytics, having regard to the fund's level of ownership in each company. For the proportion of the fund's long portfolio for which carbon emissions data is not available, the rate of carbon emissions for the long portfolio for which carbon emissions data is available, is applied. This is an estimate and is subject to change. The actual carbon emissions attributable to the fund may vary considerably from the estimate provided.

- The "Long %" is the exposure to long securities and long securities/index derivative positions, the "Short %" is the exposure to short securities and short securities/index derivative positions, the "Net %" is the difference between the long % and the short %, and the "Gross %" is the sum of the long % and short % - each as a percentage of the fund's portfolio value.
- Country classifications for securities reflect Bloomberg's "country of risk" designations.
- Sector classifications generally reflect GICS sectors. Index positions (whether through ETFs or derivatives) are only included under the relevant sector if they are sector specific, otherwise they are included under "Other".
- Figures used in market cap breakdown are sourced from Bloomberg.
- "Currency Breakdown" is the effective currency exposure as a percentage of the fund's portfolio value taking into account long and short securities, cash, forwards and long and short securities/index derivative positions. Currency classifications for securities reflect the relevant local currencies of the Bloomberg "country of risk" designations.
- As a % of the fund's portfolio value.

MONTHLY REPORT 30 SEPTEMBER 2023

FIRM AND FUND INFORMATION

Firm Overview:

Platinum Asset Management is a Sydney-based fundamental long/short equity fund manager established in 1994. Platinum's index-agnostic approach seeks to deliver long term absolute returns by looking beyond short-term market turbulence caused by events of a transient nature to seek out 'unfashionable' companies whose actual worth is greater than the value implied in their present share price. Similarly, when Platinum's research reveals that a company's prospects are overvalued, Platinum may short-sell such stocks. Platinum also seeks to protect capital via adjusting net exposure to markets.

Since D Class inception p.a.	4.8	4.7
Standard deviation (monthly annualised)	12.1	14.0

Fund Approach:

The fund's long short equity portfolio has a long bias with its net invested position able to range between 50% and 100% of the fund's NAV. The fund's net invested position will be varied through the use of shorting techniques via equity and index derivatives and through the adjustment of the fund's cash position.

Historical exposures as % of fund's PV (30 June 2016 to date)

	Minimum	Maximum	Median	Current

CONTRIBUTION TO RETURN

	Long Positions	Short Positions	Cash & Liquids
1 month	(4.2)	0.0	0.0
Calendar year to date	6.0	(2.3)	0.1

Contribution to return (CTR) is calculated by geometrically linking the daily monetary return (in USD) that the fund's long, short and cash positions contribute as a percentage of the daily average invested capital (adjusted for fund flows) over the relevant period. CTR calculations are gross of all fund fees and costs.

FIRM AND FUND INFORMATION

Firm Overview:

Platinum Asset Management is a Sydney-based fundamental long/short equity fund manager established in 1994. Platinum's index-agnostic approach seeks to deliver long term absolute returns by looking beyond short-term market turbulence caused by events of a transient nature to seek out 'unfashionable' companies whose actual worth is greater than the value implied in their present share price. Similarly, when Platinum's research reveals that a company's prospects are overvalued, Platinum may short-sell such stocks. Platinum also seeks to protect capital via adjusting net exposure to markets.

Fund Approach:

The fund's long short equity portfolio has a long bias with its net invested position able to range between 50% and 100% of the fund's NAV. The fund's net invested position will be varied through the use of shorting techniques via equity and index derivatives and through the adjustment of the fund's cash position.

CONTRIBUTION TO RETURN

	Long Positions	Short Positions	Cash & Liquids
1 month	(2.1)	0.1	0.0
Calendar year to date	2.6	0.1	0.2

Contribution to return (CTR) is calculated by geometrically linking the daily monetary return (in USD) that the fund's long, short and cash positions contribute as a percentage of the daily average invested capital (adjusted for fund flows) over the relevant period. CTR calculations are gross of all fund fees and costs.

MONTH TO MONTH FUND PERFORMANCE (D Class %)

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	YTD
2022											1.9	1.1	3.0
2023	6.1	(4.1)	(3.4)	3.7	4.7	(1.2)	5.4	(6.1)	(2.0)				2.3

Past performance is not a reliable indicator of future performance. Returns are in US\$ and could be reduced, or losses incurred, due to currency fluctuations.

Source: Platinum Investment Management Limited for fund returns and CTR. Fund returns are total returns, calculated using the NAV per share of D Class, are pre-tax, net of fees and costs (note the anti-dilution levy is not an expense of the fund) and assume the accumulation of net income and capital gains.

Estimated tonnes of carbon
emissions per 100k invested 0.5

This estimate has been calculated by Platinum and represents the sum of the carbon emissions from the fund's underlying long stock positions, based on the closest match and latest data available in Sustainalytics, having regard to the fund's level of ownership in each company. For the proportion of the fund's long portfolio for which carbon emissions data is not available, the rate of carbon emissions for the long portfolio for which carbon emissions data is available, is applied. This is an estimate and is subject to change. The actual carbon emissions attributable to the fund may vary considerably from the estimate provided

1. The "Long %" is the exposure to long securities and long securities/index derivative positions, the "Short %" is the exposure to short securities and short securities/index derivative positions, the "Net %" is the difference between the long % and the short %, and the "Gross %" is the sum of the long % and short % - each as a percentage of the fund's portfolio value.

2. Country classifications for securities reflect Bloomberg's "country of risk" designations.

3. Sector classifications generally reflect GICS sectors. Index positions (whether through ETFs or derivatives) are only included under the relevant sector if they are sector specific, otherwise they are included under "Other".

4. Figures used in market cap breakdown are sourced from Bloomberg.

5. "Currency Breakdown" is the effective currency exposure as a percentage of the fund's portfolio value taking into account long and short securities, cash, forwards and long and short securities/index derivative positions. Currency classifications for securities reflect the relevant local currencies of the Bloomberg "country of risk" designations.

6. As a % of the fund's portfolio value.
