MONTHLY REPORT 31 JANUARY 2022

FIRM AND FUND INFORMATION

Firm Overview:

Platinum Asset Management is a Sydney-based fundamental long/short equity fund manager established in 1994. Platinum's index-agnostic approach seeks to deliver long term absolute returns by looking beyond short-term market turbulence caused by events of a transient nature to seek out 'unfashionable' companies whose actual worth is greater than the value implied in their present share price. Similarly, when Platinum's research reveals that a company's prospects are overvalued, Platinum may short-sell such stocks. Platinum also seeks to protect capital via adjusting net exposure to markets.

Estimated tonnes of carbon emissions per 100k invested **9.1**

This estimate has been calculated by Platinum and represents the sum of the carbon emissions from the fund's underlying long stock positions, based on the closest match and latest data available in Sustainalytics, having regard to the fund's level of ownership in each company. For the proportion of the fund's long portfolio for which carbon emissions data is not available, the rate of carbon emissions for the long portfolio for which carbon emissions data is available, is applied. This is an estimate and is subject to change. The actual carbon emissions attributable to the fund may vary considerably from the estimate provided.

- The "Long %" is the exposure to long securities and long securities/index derivative positions, the "Short %" is the exposure to short securities and short securities/index derivative positions, the "Net %" is the difference between the long % and the short %, and the "Gross %" is the sum of the long % and short % - each as a percentage of the fund's portfolio value.
- Country classifications for securities reflect Bloomberg's "country of risk" designations.
- Sector classifications generally reflect GICS sectors. Index positions (whether through ETFs or derivatives) are only included under the relevant sector if they are sector specific, otherwise they are included under "Other".
- Figures used in market cap breakdown are sourced from Bloomberg.
- "Currency Breakdown" is the effective currency exposure as a percentage of the fund's portfolio value taking into account long and short securities, cash, forwards and long and short securities/index derivative positions. Currency classifications for securities reflect the relevant local currencies of the Bloomberg "country of risk" designations.
- As a % of the fund's portfolio value.

Estimated tonnes of carbon emissions per 100k invested

7.8

This estimate has been calculated by Platinum and represents the sum of the carbon emissions from the fund's underlying long stock positions, based on the closest match and latest data available in Sustainalytics, having regard to the fund's level of ownership in each company. For the proportion of the fund's long portfolio for which carbon emissions data is not available, the rate of carbon emissions for the long portfolio for which carbon emissions data is available, is applied. This is an estimate and is subject to change. The actual carbon emissions attributable to the fund may vary considerably from the estimate provided

- The "Long %" is the exposure to long securities and long securities/index derivative positions, the "Short %" is the exposure to short securities and short securities/index derivative positions, the "Net %" is the difference between the long % and the short %, and the "Gross %" is the sum of the long % and short % - each as a percentage of the fund's portfolio value.
- Country classifications for securities reflect Bloomberg's "country of risk" designations.
- Sector classifications generally reflect GICS sectors. Index positions (whether through ETFs or derivatives) are only included under the relevant sector if they are sector specific, otherwise they are included under "Other".
- Figures used in market cap breakdown are sourced from Bloomberg.
- "Currency Breakdown" is the effective currency exposure as a percentage of the fund's portfolio value taking into account long and short securities, cash, forwards and long and short securities/index derivative positions. Currency classifications for securities reflect the relevant local currencies of the Bloomberg "country of risk" designations.
- As a % of the fund's portfolio value.

FIRM AND FUND INFORMATION

Firm Overview:

Platinum Asset Management is a Sydney-based fundamental long/short equity fund manager established in 1994. Platinum's index-agnostic approach seeks to deliver long term absolute returns by looking beyond short-term market turbulence caused by events of a transient nature to seek out 'unfashionable' companies whose actual worth is greater than the value implied in their present share price. Similarly, when Platinum's research reveals that a company's prospects are overvalued, Platinum may short-sell such stocks. Platinum also seeks to protect capital via adjusting net exposure to markets.

Fund Approach:

The fund's long short equity portfolio has a long bias with its net invested position able to range between 50% and 100% of the fund's NAV. The fund's net invested position will be varied through the use of shorting techniques via equity and index derivatives and through the adjustment of the fund's cash position.
